

DATASET CLEANING CHANGE LOG

Introduction

This document outlines the data cleaning and preprocessing steps performed on the dataset to improve consistency, accuracy, completeness, and usability for analysis.

Change Log

Change ID	Cleaning Action	Description	Impact	Status
CR001	Standardized Date Format	Converted all date values to YYYY-MM-DD format	Improved date consistency and sorting	Resolved
CR002	Duplicate Check	Checked dataset for duplicate records	Ensured record uniqueness and data integrity	Resolved
CR003	Missing Value Handling	Handled missing values by replacing blank entries with 'N/A' where appropriate	Reduced incomplete entries	Resolved
CR004	Text Cleaning	Proper Case Applied, Trim, and Clean transformations	Removed extra spaces and non-printable characters	Resolved
CR005	Data Type Validation	Ensured columns use correct data types	Improved accuracy for calculations and analysis	Resolved
CR006	Numeric Precision	Standardized currency numeric fields to 2 decimal places	Improved formatting consistency	Resolved
CR007	Currency Formatting	Added currency formatting to Unit Price and Total Price columns	Improved readability of financial values	Resolved
CR008	Column Standardization	Standardized column names and spacing conventions	Improved dataset readability and consistency	Resolved

Conclusion

The dataset was successfully cleaned and standardized using Power Query in Excel. The performed transformations improved data consistency, accuracy, completeness, formatting, and overall usability for future analysis and reporting.
